Douglas,

Maybe something like this to broaden the scope of the processes the involved agencies (BLM, EPA, NRC, SDENR) will be concurrently undertaking?

Sincerely,

[I need to take annual leave Thursday and won't be able to refine this until Friday AM]

Sorry about this last email...I just realized that the slide was created a while ago. Could you update it reflecting the timeline I sent you yesterday? Perhaps we could visually broaden the more recent history and shrink the history through the end of 2013?

How about the decision process slide?

Lucita,

I had prepared this one-page comparable organizational chart in my own follow-up to the RA briefing. It says the same things you have said and juxtaposes our hierarchy to answer the RA's question about whom he might communicate

directly. The final piece of staff work would be provide the email and phone contacts for the NRC officials as the RA and COS may request. In addition, I offer the attached timeline chart that shows the respective agencies' activities and future processes or decisions to address the RA's information needs expressed at the briefing.

Jim: per your earlier input to me on NRC, could you please assist Lucita ASAP with ccs to Valois and me?

Thanks,

Douglas

At the briefing last week, Joan asked questions about the NRC's organization and who Shaun's counterpart would be. Bob and Paul want to make sure that I get back to her on these questions. I haven't figured out who his counterpart would be, but I can give her information on the organization. This is my understanding about their organization for this license:

Ron Burrows – Project manager – He and Haimanot seem to be staff level. He is the safety review contact, and Haimanot is the environmental review contact.
Bill von Till – Chief, Uranium Recovery licensing branch – supervises the staff that work on uranium ISL licenses
Drew Persinko – Deputy Director, Decommissioning and Uranium Recovery and licensing
Larry Camper – Director, Division of Waste Management and Environmental Protection
Brian Holian, Acting Director, Office of Federal and State Materials and Environmental Management and Environmental Protection

I know that in our NEPA discussions, we went as high as Larry Camper, but it was Drew Persinko that came to meet with us in Denver. Bill von Till seems to be the person highest up with more detailed knowledge of this project. Do you know who signs the license, and who might be Shaun's counterpart?
